

QUINTECH

INCORPORATED SINCE 1997

SECURITY CONSULTING SERVICES

Ever since its Incorporation in 1997 Quintech has been successful in the Government, Education, and Commercial sectors. As a small business that specialize in delivering professional Security Consulting Services one of the first major projects occurred back in 2007 when SPAWARSYSCEN tasked Quintech to perform an assessment of all telecommunications (telecomm) closets throughout the United States Department of Agriculture (USDA), particularly in the South and Whitten Buildings, Washington, DC. The purpose of the assessment was to evaluate the telecomm closets access control and security and provide recommendations, as necessary for the improvement and upgrade of all closets.

After the successful completion of the USDA project, Quintech was awarded a similar contract with the Department of Homeland Security Office of Intelligence & Analysis (DHS OI&A) in 2008. Although the projects were similar in scope, DHS decided to increase Quintech's responsibility to manage the security & access control of its High Security Data Network (HSDN) and also control the design & construction management of these locations throughout the United States. Quintech is currently in its fourth year with managing the HSDN installations for DHS OI&A.

The additional scope of work added by DHS OI&A led to the company's expansion and development of the Engineering & Construction Management Division.

ENGINEERING & CONSTRUCTION MANAGEMENT

Quintech expanded its range of services in 2008 to provide Engineering & Construction Services to clients in demand of front-end consulting/engineering services and back-end project management/quality control services. This expansion opened the door to other lucrative contracts besides DHS OI&A it also paved the way to other contract vehicles such as NAVFAC SE, ROICC, SHAW Airforce Base and General Services Administration.

SECURITY

INCORPORATED SINCE 1997

SUGAR GROVE NAVAL STATION, WV

Quintech was tasked to install a high security anti-ram barrier system by Ameristar as a part of a security upgrades project at Sugar Grove Naval Station. The post and rail system is capable of stopping a 15,000 lbs. truck traveling at 50 mph in just 3', protecting the lives of our nation's service members.

HARBOR & MARINA LIVING - COMMUNITY AWARENESS

WINDMILL HARBOR - SC

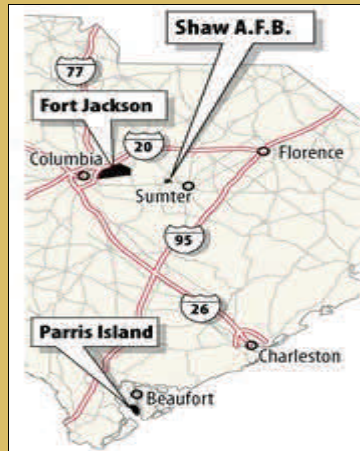

Windmill Harbor tasked Quintech with providing a Vulnerability Assessment of the Windmill Harbor Community to determine the current status of the property security and help identify gaps in current security measures. The scope includes a comprehensive assessment of points of access, the surrounding grounds, exterior barriers, lighting, and security measures currently in place.

NAVFAC SOUTH EAST ROICC

NAVAL FACILITIES ENGINEERING COMMAND

Quintech has been awarded several contracts by the NAVFAC SE ROICC that pertain to renovation of buildings, modular barracks and roofing. Quintech has also been awarded multiple contracts to oversee the Preventative Maintenance for critical equipment found at Beaufort Naval Hospital, MCAS and MCRD.

3RD ARMY HEADQUARTERS

SHAW AFB PATTON HALL - SC

Quintech was contracted by the 3rd Army Headquarters to manage the addition of power circuits throughout Patton Hall in several areas that were not identified during the design or construction phase of the facility. Providing power as needed allowed 3rd Army personnel to maintain the same level of services the command was accustomed to in Atlanta, the previous home of 3rd Army Headquarters.

GSA BANKRUPTCY COURT- SC

As the contractor on this project, Quintech provided labor, material, means and methods to perform the interior work on the basement level of the existing US Bankruptcy Courthouse. The work included, but not limited to selective demolition of floor finishes and ceiling; the construction of a new server room with security glazing and a raised access floor, new finishes and associated electrical and mechanical work.
