Company Information	4	

The mission of the *Engineering & Construction Services Division* is to provide security engineering and construction services to clients requiring a more secure work environment. To accomplish this mission we assist clients in finding security and construction solutions for effective facility management.

Quintech’s mission for the *Infrastructure Support Services Division* is to provide a team of experienced installers of conduit, cabling and devices associated with Alarm, Surveillance, and Fire Systems to back the efforts of the Consulting, Engineering & Construction Management services. Quintech has partnered with well-known companies such as ADT, Stanley Convergent and Simplex Grinnell for support of the actual system installation and programming. The addition of the Engineering & Construction Services and Infrastructure Support Services Divisions has increased Quintech’s overall capabilities and reputation as a Security Consulting and Construction Management firm.

Quintech has always been dedicated to providing clients with front-end consulting/engineering services and with back-end project management/quality control services. Quintech, the “keystone” within the Engineering and Construction Management Services sector, is known for providing the “**Intelligent Solution**”.

Inside this issue, we provide an overview of the types of clientele and levels of experience possessed by the company as a whole. Quintech has been privileged to provide support services to the Department of Homeland Security (DHS), General Services Administration (GSA), Naval Facilities Engineering Command (NAVFAC), the United States Postal Service (USPS) and many more.

## Department of Homeland Security Office of Intelligence & Analysis (OI&A)

2010 ended with Quintech successfully managing the construction and implementation of Homeland Security Data Network (HSDN) facility and security upgrades for DHS Fusion Centers. Between 2008 and 2010, Quintech has successfully completed an estimated thirty plus (30+) locations. DHS OI&A recently awarded Quintech its third contract for an additional eight (8) locations. The new locations include the following states: California, Michigan, Pennsylvania, South Dakota, Vermont, and Wyoming.

## Department of Homeland Security Office of Inspector General (OIG)

Quintech, along with an integration partner, performed facility upgrades and installations of existing Electronic Access Control Systems (EACS) for DHS OIG Headquarters, Washington DC and at the Marlton, NJ field office. The projects required installing new equipment, integration with existing equipment, and programming. The project goal was to provide both offices with reliable systems utilizing Personal Identity Verification (PIV) technology that would yield the efficiency and accessibility for personnel while also securing the facility against calculated threats. To complete this task, Quintech evaluated existing systems for performance, capabilities and upgrade requirements, recommended the appropriate measures to secure the facility, and installed and integrated new security/access control technologies. The completion of this program has led to a follow-up program of a similar scope currently in progress.

## General Services Administration (GSA)

### Hiram H. Ward U.S. Courthouse, Winston-Salem NC

Recently, Quintech was awarded a contract to design and construct a Physical Access Control System for Hiram H Ward courthouse in Winston-Salem, North Carolina. Quintech is tasked with providing protection against cyber attacks and information security vulnerabilities. The project will consist of replacing the existing Physical Access Control System with a turn-key system which includes the replacement of six (6) access control devices and the installation of one (1) additional device.

### J. Bratton Davis U.S. Bankruptcy Courthouse Server Room, Columbia SC

The general scope of the project involves interior work on the Basement Level of the US Bankruptcy Courthouse. The project will consist of some floor finish and ceiling demolition; construction of a New Server Room with security glazing and a raised access floor, as well as new finishes and associated electrical and mechanical work.

### Matthew Perry Parking Garage, Columbia SC

Quintech was tasked by the GSA to provide design, procurement and installation services at the Matthew Perry Parking Garage in Columbia, SC. This project consists of securing the parking garage by managing the upgrades of two (2) overhead doors; repairing the door hardware for four (4) pedestrian entry/exit doors and upgrading the existing Access Control System. In addition to those upgrades, new card readers were installed in the garage elevators and twelve (12) card readers were strategically placed on the center stairwell entry doors.

## Naval Facilities Engineering Command (NAVFAC)

### MCAS Beaufort, SC & MCRD Parris Island, SC

Quintech has been awarded multiple contracts by the Naval Facilities Engineering Command (NAVFAC) for the Marine Corps Air Station (MCAS) Beaufort and Marine Corps Recruit Depot (MCRD) at Parris Island. Quintech's Engineering and Construction Division is currently managing the following projects.

Building 7003— Quintech is providing Construction Management services for the renovation of three (3) wings in Building 7003, including the repair, preparation and painting of head facilities, laundry and deep sink rooms, and Squad Bay/Quarter Deck areas.

MRAP— Quintech is providing Construction Management support for the design/build of a new Mine Resistant Ambush Protected (MRAP) Egress Training Facility.

Veterinary Clinic -Quintech is providing Construction Management support to repair and renovate the entire Veterinary Clinic. The work requires the demolition of ceilings, and walls, a new split-system heat pump, lighting upgrades and roofing material replacement.

### NAVFAC Port Hueneme, CA

Quintech was one of the awardees on the NAVFAC, Port Hueneme, California Antiterrorism / Force Protection (AT/FP) contract. The contract is a task order-based contract that allows NAVFAC to request AT/FP services worldwide. The scope includes the development of new and innovative security countermeasures to mitigate vulnerabilities and to conduct antiterrorism training.

### Task Order 0001

Electronic Assessment and Surveillance (EASS)—Quintech was tasked by NAVFAC Port Hueneme to conduct a comprehensive survey of an existing exterior Electronic Assessment and Surveillance System (EASS) at an undisclosed location. Quintech was to perform a visual assessment and analysis of the facility perimeter and grounds; CCTV monitoring and display capabilities; existing cameras and camera placement; perimeter zone CCTV coverage; perimeter and grounds lighting; lighting types; lighting placement and interaction with CCTV cameras; and foliage. The project goal was to identify system deficiencies and provide a comprehensive analysis with recommendations for corrective action.

## United States Postal Service (USPS)

Starting in May 2010, Quintech began providing professional services to the USPS for the design assessment, installation audit and life-cycle support for IP-based CCTV systems and products. There are several tasks that Quintech will perform under this contract. Among these are to 1) evaluate the best practices, technologies and methodologies of the existing system deployments and design 2) conduct audit reviews of installation work and 3) perform system health monitoring, failure tracking and reporting. Through its extensive auditing process, Quintech has helped the USPS receive numerous credits from the current system integrator saving several thousands of dollars.
